Publicat

Introduction

What is Publicat?

Publicat is an index and microfiche service providing access to current Canadian federal documents.

There are actually two services provided by Publicat:

- The Publicat Index is a bibliographic reference tool covering Canadian Federal Government publications of general reference value. Designed to supplement the Daily Checklist of Government Publications and the Special List, the Publicat Index provides comprehensive coverage of current documents and serials not appearing in the checklists and catalogues. In addition, and to increase its utility as a reference aid, Publicat indexes selected monographs of reference value which may appear on the checklists.
- The Publicat microfiche service gathers together and releases for general use a significant body of federal documents which has hitherto been available in limited quantities only through a wide variety of issuing agencies. These publications are:
 - unavailable through the regular catalogue service of the government publisher, the Publishing Centre of the Department of Supply and Services
 - of reference value to an audience wider than that likely to be reached by the original publication

Not every publication listed in the index is available on microfiche. For each document not microfilmed an indication is provided in the index as to its availability from another source, price (if any) and catalogue number. Your library may have a subscription to the *Publicat Index* only, and not to the microfiche service. If you require the microfiche of a particular publication, consult your librarian.

Avant-Propos

Qu'est-ce que Publicat?

Publicat est un service d'indexation et de microfiches qui donne accès à les documents fédéraux au Canada.

Publicat offre en réalité deux services:

- L'Index Publicat est un moyen de référence bibliographique couvrant les publications du Gouvernement fédéral d'intérêt référentiel général. Destiné à compléter la Liste quotidienne des publications du gouvernement canadiens et la Liste spéciale, l'Index Publicat donne une nomenclature complète des derniers documents et des publications sériées qui ne figurent pas dans les listes de contrôle et les catalogues. En plus, l'utilité de Publicat comme source de référence est augmentée par son répertoire de monographies d'intérêt référentiel qui peuvent se trouver dans les listes de contrôle.
- Le service de microfiches Publicat collige et publie une série importante de documents fédéraux qui n'étaient jusqu'ici disponibles qu'en quantités limitées, par l'intermédiaire d'un grand nombre d'agences. Ces publications sont:
 - impossibles à obtenir par l'intermédiaire du service normal des catalogues de l'éditeur du gouvernement, du centre de publication du Ministère des approvisionnements et services
 - d'un intérêt référentiel pour un nombre de personnes plus grand que celui que la publication originale peut atteindre.

Toutes les publications de l'index ne sont pas disponibles sur microfiches. Pour tout document non disponible sur microfiche, l'index indique l'endroit où le trouver, son prix (s'il y a lieu) et le numéro de catalogue. Votre bibliothécaire ne peut être abonnée qu'à l'Index Publicat et non pas au service de microfiches. S'il vous faut une microfiche d'une certaine publication, consultez votre bibliothécaire.

What are the types of publications included in Publicat?

The guidelines for *Publicat* specify all documents of the following descriptions issued by the departments and agencies of the Government of Canada after November 1, 1976.

- annual reports
- research reports and special studies, including those submitted by outside consultants working under contract to Government departments and agencies
- policy announcements and important press releases
- position papers and discussion guides
- selected proceedings of government-sponsored conferences
- working papers and planning studies
- public documents prepared for commissions of inquiry
- significant statements and speeches
- · bibliographies and catalogues
- organization manuals and directories
- serials of reference value for which indexing is unavailable from other sources. Only issues appearing after January 1, 1977 are indexed

These documents are acquired through the cooperation and assistance of federal departmental libraries and information services, as well as through regular acquisition channels.

What types of publications does Publicat exclude?

- public relations literature and general information pieces
- geological surveys and maps
- highly specialized scientific and technical publications
- routine documentation (e.g., contract announcements)
- bills, acts and statutes (with the exception of office consolidations of important bills)
- court reports and decisions of commissions and regulatory bodies
- gazettes and regulations
- regular parliamentary publications, including Debates, Journals and Committee publications
- Statistics Canada publications
- serials indexed elsewhere, or those of limited reference value

General guidelines

It is important to stress that *Publicat* is a service, not a fixed collection. Its value will be determined by its fulfillment of the requirements of users. To this extent, the parameters and standards for inclusion and exclusion will be kept under constant review and broadened where possible.

Quelles sortes de publications Publicat comprend?

Les directives de *Publicat* indiquent tous les documents suivants publiés par les ministères et les agences du Gouvernement du Canada après le 1er novembre 1976.

- Rapports annuels
- Rapports de recherche et études spéciales, y compris les contributions d'expérts-conseils travaillant sous contrat pour les ministères et les agences du Gouvernement
- Divulgations de résolutions et de communiqués de presse importants
- Documents de prises de position et guides de discussion
- Délibérations de conférences commanditées par le gouvernement
- Documents de travail et études de planification
- Documents publics préparés par les commissions d'enquête
- Déclarations et discours importants
- Bibliographies et catalogues
- Manuels d'organisation et répertoires
- Publications sériées d'intérêt référential général pour lesquels l'index ne peut s'obtenir par l'intermédiaire d'autres sources. Seules les publications postérieures au 1er janvier 1977 sont indexées.

Ces documents peuvent s'obtenir grâce à la coopération et à l'assistance des bibliothèques et des services d'information des ministères fédéraux, ainsi que par l'entremise des moyens d'acquisition réguliers.

Quelles sortes de publications Publicat ne comprend pas?

- Documentations de relations publiques et articles d'information générale
- Explorations géologique et cartographie
- Publications techniques et scientifiques très spécialisées
- Documentation courante (soit avis de contrat)
- Projets de loi, lois et statuts (sauf les consolidations de projets de loi importants
- Rapports judiciaires et décisions de commissions et des organismes régulateurs
- Gazettes et règlements
- Publications parlementaires normales, y compris les débats, rapports et comptes-rendus de comités
- Publications de Statistique Canada
- Publications sériées indexés autre part, ou ceux d'intérêt référentiel limité

Directives générales

Il faut se rappeler que *Publicat* est un service et non pas une collection inchangeable. Sa valeur sera déterminée par les avantages qu'en retireront ceux qui l'emploieront.

A cet effet, les paramètres et les normes pour l'inclusion et l'exclusion seront continuellement réexaminés et augmentés chaque fois que cela sera possible.

Which Federal Government bodies are covered?

Publicat includes publications of these types issued by all departments, boards, branches, commissions and crown corporations of the executive branch of the federal government in Canada. Not covered are the legislative branch and the judiciary. Every attempt will be made to ensure that such coverage is comprehensive within the Publicat quidelines.

How current is Publicat?

Every attempt is made to minimize the time lapse between the issuance of a publication and its appearance in *Publicat*. On the average, documents should appear in the index about two months after their publication date.

How do I use the Publicat Index?

Utilizing advanced data base publishing techniques, the *Publicat Index* is issued in a monthly loose leaf format with an annual clothbound cumulation and is fully bilingual. The index is divided into three parts: Bibliographic Section, Subject and Name Index and Title Index.

Bibliographic Section

This, the primary section of the index, lists all publications by corporate author, arranged in alphabetic and numeric sequence. Each document included in the *Publicat Index* is computer-assigned a unique four-digit document number. This acts only as a location device providing access from both the Subject and Name Index and the Title Index to the Bibliographic Section; it serves no other function. Only in this part of the index will the user find full bibliographic information including: corporate author; title; place and date of publication; collation; notes providing fuller details; availability information for documents not included in the microfiche service; government catalogue number; price; series title; microfiche accession number.

Subject and Name Index

Documents accorded full bibliographic treatment in the Bibliographic Section are analysed in the Subject and Name Index by subject, personal and non-governmental corporate name and geographic area. Up to three subject levels are provided, where necessary, and full cross-referencing between headings facilitates access. This section of the index is also bilingual with French and English subject headings and names interfiled alphabetically. Entries are displayed by title or, in some cases, annotated title. Reference to the Bibliographic Section is supplied by the document number.

Articles in regular serials (as distinguished from monographic series) are indexed by subject and name with all bibliographic information being provided (serial title abbreviation, volume, number, date and pagination). Serials do not appear in the Bibliographic Section.

Title Index

As a further point of access all documents included in the *Publicat Index* are displayed alphabetically by title. Where applicable, alternate or abbreviated titles will be used for certain documents. As in the Subject and Name index reference to the Bibliographic Section is by document number.

Quels organismes du Gouvernement fédéral sont inclus?

Publicat inclut les publications provenant de tous les ministères, conseils, sections, commissions et sociétés de la couronne du secteur exécutif du Gouvernement fédéral au Canada. Le secteur législatif et le secteur judiciaire n'y sont pas inclus. On prendra toutes les mesures nécessaires pour qu'une telle inclusion soit complète dans le cadre des directives Publicat.

Publicat sera-t-il tenu régulièrement à jour?

On essaiera le plus possible de réduire l'intervalle entre la parution d'une publication et son inclusion dans *Publicat*. En moyenne, on estime que les documents devraient se trouver dans l'index deux mois environ après la date de la publication

Comment puis-je utiliser l'index Publicat?

Utilisant des techniques de publication de l'informatique moderne, l'Index Publicat est publié mensuellement en feuilles mobiles et en volume annuel relié de toile. Cet index bilingue se divise en trois parties: section bibliographique, index des sujets et des noms et index des titres.

Section bibliographique

Cette section primaire de l'index est la liste complète des publications par auteurs corporatifs, disposées par ordre alphabétique et numérique. Chaque document inclut dans l'Index Publicat est identifié par un numéro de quatre chiffres assigné par ordinateur. Il s'agit d'un moyen de repérage à la fois pour l'Index des noms et des sujets et l'Index des titres de la section bibliographique. C'est dans cette partie de l'Index seulement que l'usager trouvera toute l'information bibliographique, soit: auteur corporatif; titre; lieu et date de la publication; compilation; remarques détaillées; disponibilité de documents non inclus dans le service microfiche; prix; titre de série; numéro d'accès à la microfiche.

Index des sujets et des noms

Les documents insérés dans la section bibliographique sont analysés dans l'Index des sujets et des noms par sujets, nom corporatif, nom gouvernemental et région géographique. Jusqu'à trois niveaux de sujets sont donnés quand c'est nécessaire, et un renvoi entre les titres facilite la recherche. Cette section de l'index est aussi bilingue en ayant les titres des sujets et les noms en français et en anglais par ordre alphabétique. Les inscriptions sont faites par titre ou, dans certains cas, par titre avec annotation. La référence à la section bibliographique est fournie par le numéro de document.

Les articles des séries courantes (à l'exception des séries monographiques) sont indexées par sujet et nom, avec toutes les informations bibliographiques nécessaires (soit abréviation du titre de la série, volume, numéro, date et pagination). Les séries ne se trouvent pas dans la section bibliographique.

Index des titres

Pour faciliter davantage l'accès à toute la documentation incluse dans l'Index Publicat, les documents sont présentés alphabétiquement par titre. S'il y a lieu, des titres abrégés ou des seconds titres seront utilisés pour certains documents. Comme dans l'index des sujets et des noms, toute référence à la section bibliographique est faite par numéro de document.
